

KLINGELNBERG
LOOKING BACK ON CONTROL 2014

FIVE AREAS OF EXPERTISE. UNIQUE SOLUTIONS. MULTIPLE BENEFITS.

KLINGELNBERG

FIVE AREAS OF EXPERTISE. UNIQUE SOLUTIONS. MULTIPLE BENEFITS.

On this theme, Klingelberg enjoyed a successful turnout at this year's Control trade fair, which took place in Stuttgart from 06th to 09th May 2014.

The stand this year was designed to accommodate five segments: "Gear measurement," "Shop-floor measurement," "Dimension, form, and position measurement," "Measured value analysis," and "Services." This gave our trade fair visitors the opportunity to gain "hands-on" experience with innovative measuring technology on measuring machines exhibited in the five corresponding areas and to define the measurement tasks themselves, with the help of our technical experts.

The participation of Prof. Dr.-Ing. Günther Gravel, Head of the Institute for Production Technology at the University of Applied Sciences (HAW) in Hamburg, also met with a positive response. On two days during the fair, our stand visitors were able to avail themselves of his technical expertise in the area of measured value analysis, resulting in some very stimulating discussions.

Presentation of the KLINGELNBERG Gear Measurement Technology division at this year's Control trade fair in Stuttgart.

Thank you for visiting the trade fair!

For any other questions you may have about gear-measurement technology, our team of experts would be happy to advise you and is looking forward to working with you.

Facts and information about Control 2014

- International trade fair for quality assurance (28th year)
- 25,445 visitors from 89 countries in all
- Presentation of around 20 global innovations of products covering all aspects of quality assurance
- Take note now: The next Control fair will take place from 05th to 08th May 2015 in Stuttgart (source: www.control-messe.de, 12 May 2014)

Prof. Dr.-Ing. Günther Gravel explains the advantages and practical use of measured value analysis.

Presentation of "Gear measurement," one of the five segments at the center of this year's Control fair.

Technical experts from Klingelberg present innovative measuring technology in a "hands-on" demonstration on exhibited machines.

We will be happy to send you product literature on our measuring machines upon request. Contact us at: info@Klingelberg.com.
