

MANAGEMENT

SMART FACTORY

SMART PRODUCTION PLANNING & PROCESS EXCELLENCE

Revolutionize your production planning with an intelligent scheduling algorithm that sequences work orders, prioritizes delivery deadlines, minimizes downtime, and balances machine capacity. Automatically assign work orders based on machine availability and load. Benefit from real-time schedule adjustments that increase flexibility and reduce manual errors. Seamless, automated, and optimized — unlock the full potential of intelligent planning today.

HIGHLIGHTS:

- Fast shopfloor integration
- Easy connectivity to existing ERP systems
- Ready to use via web application
- Real-time transparency on machine availability, utilization, and process progress
- Intelligent work-order scheduling and machine assignment based on real-time data
