HMI

SMART FACTORY

REAL-TIME TRANSPARENCY AND INTERACTION ACROSS THE ENTIRE SHOP FLOOR

Gain a comprehensive overview of your ongoing production with real-time data and seamless operator interactions. The Smart Factory HMI is more than just an interface—it is the digital nerve center of your production. Designed specifically for machine operators, it offers real-time connectivity, seamless shift management, and actionable insights at a glance.

HIGHLIGHTS:

- Simple operator guidance for maximum process reliability
- Effortless shift management
- Complete transparency of production orders and shop floor activities
- Live updates on machine downtime and deviations
- Intelligent detection of downtime
- Proactive monitoring of runtimes
- Context-sensitive delivery of process information on the shop floor
